VOLODYMYR KURDIUKOV

I'm 31 years old, and i'm a self-taught WEB-DEVELOPER (HTML, CSS, JS).

I passed several courses and learned all necessary basic

knowledge related to web programming. I'm pretty sure that i will absolutely fill the junior web developer position requirements. But if you are looking for a trainee candidate don't hesitate and text me.

I have completed several courses on Udemy , and some courses on Youtube and I can

say that its awesome! Also, I have read almost all the official HTML CSS JS

documentation, continue to learn HTML CSS JS on various resources, began to study

libraries such as React on such resources as www.w3schools.com, FreeCodeCamp.org,

learn.javascript.ru, htmlbook.ru, udemy.com

I have done several projects for customers, from simple landing pages to multi-page sites, the customers were satisfied.

I strictly understand what i need, and i hope to find a company that can help me with my ambitions to grow and learn.

As for me, i can give you back all roy knowledge and passion for programming.

I'm pretty sure you will be surprised after a talk with me!!!:)
